

# NW 92<sup>ND</sup> AVENUE RECONSTRUCTION

DORAL, FLORIDA

---

MARLIN performed design and construction engineering inspections (CEI) for the extension of NW 92<sup>nd</sup> Avenue, connecting NW 25<sup>th</sup> Street and NW 33<sup>rd</sup> Street. Completed on time and approximately \$85,000 under budget, the NW 92<sup>nd</sup> Avenue reconstruction alleviates congestion on NW 87<sup>th</sup> Avenue and NW 97<sup>th</sup> Avenue.

This new roadway enhances connectivity for hundreds of City of Doral residents as well as improves emergency response times for Doral Police stationed at the new Police Substation. Improved connectivity for the Vanderbilt community, freight traffic and commuters to Miami-Dade County Police and US Southern Command also benefit from these improvements.

The project includes four traffic lanes (two lanes in each direction), a storm water drainage system, curb and gutters, street lighting, ADA improvements, a bicycle/pedestrian shared use path on the east side of the road, permitting, utility coordination, signing and marking, signalization analysis, and crosswalks (Rectangular Rapid Flashing Beacons).
