

RAISED AND PROTECTED BIKE LANES AT SW 16TH STREET

MIAMI, FLORIDA

MARLIN created a conceptual and feasibility analysis of raised and protected bike lanes at SW 16th street from west of SW 107th avenue to the east of SW 104th place adjacent to Florida International University (FIU) campus in Miami-Dade County.

The feasibility analysis consisted of typical section analysis, horizontal and vertical geometric analysis, traffic control analysis, and preliminary cost estimates based on the most current Master Pay Item List and right of way costs.
